

Module 3 Assignment 3B: Secure Product Contact Form

Course: CS 85 - PHP Programming

Instructor: Vicky Seno

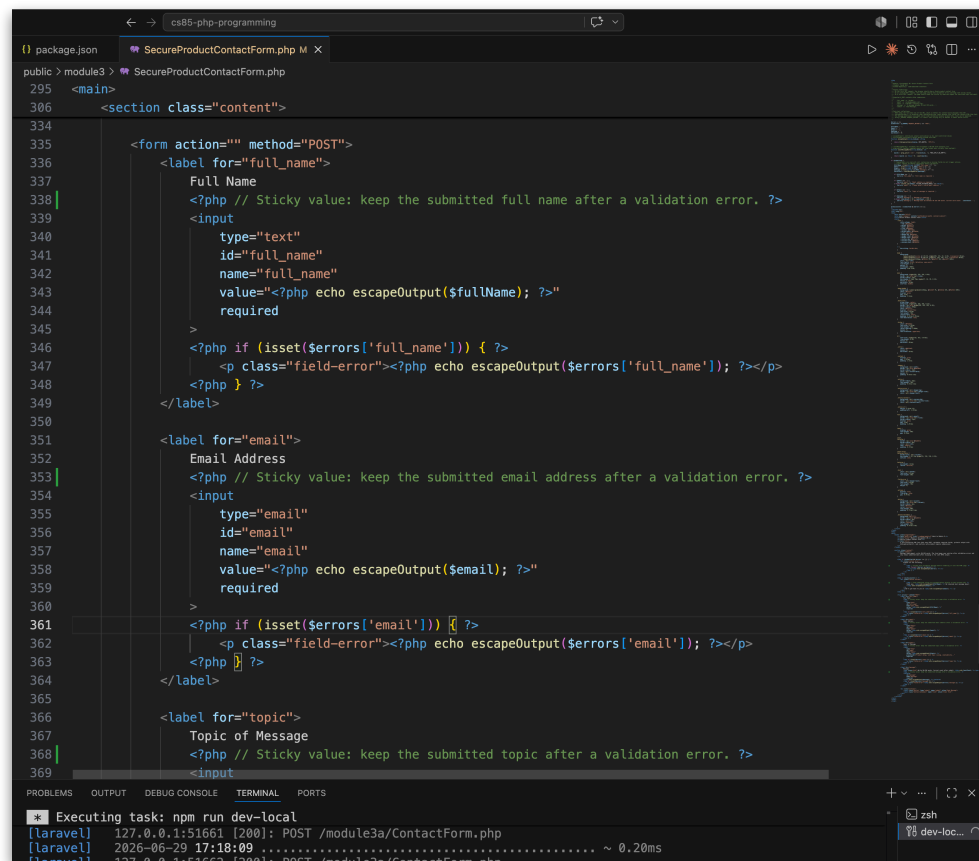

For this assignment, I updated the product contact form to make it more secure and user-friendly. I added server-side validation for the required fields, sanitized the submitted input, and escaped output before displaying values back on the page. This helps protect the form from unsafe input and common issues like XSS.

I also kept the form values “sticky” after validation errors, so users do not lose their entered information if they submit the form with a mistake.

Screenshot 2: Contact form showing validation errors in the browser

The screenshot shows a web browser window with a dark theme. The address bar displays "127.0.0.1". The page content is centered on a light blue background. At the top, there is a dark blue header with a "Back to Module 3" button and the text "MODULE 3 ASSIGNMENT 3A". Below this is the main heading "Review and Comment on Form" in large white text. A paragraph of text explains that the page keeps the course "Contact Me" script in one PHP file and documents how validation, sticky form values, and message handling work. Below the text, there are three red error messages in rounded rectangles: "Your Name" is a required field, "Your E-mail" is not a valid e-mail address, and "Subject" is a required field. A blue message box below these states "Please re-enter the form information below." The main form, titled "Contact Me", is a white rounded rectangle containing four fields: "Your Name:" (empty), "Your E-mail:" (containing "hancharou_siarhei@@@student.smc.edu"), "Subject:" (empty), and "Message:" (containing "Module 3 Assignment 3B: Secure Product Contact Form"). At the bottom of the form are two buttons: "Clear Form" and "Send Form".

MODULE 3 ASSIGNMENT 3A

Review and Comment on Form

This page keeps the course Contact Me script in one PHP file, then documents how validation, sticky form values, and message handling work.

"Your Name" is a required field.

"Your E-mail" is not a valid e-mail address.

"Subject" is a required field.

Please re-enter the form information below.
